

BARAZIN

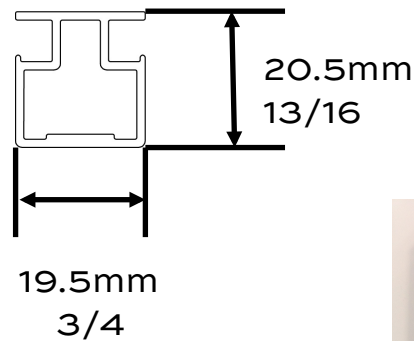

VERRE - ALUMINIUM - GLASS

TRAVERSE TECHNICAL INFORMATION

BARAZIN doors, only in our 88 and 90 profiles, can be separated with an aluminium divider. It is available with a CA, SS, black (BLK) and white (WHT) powder coating. Therefore, it is possible to have taller than usual maximum size doors. It also allows to blend combinations of glass textures and create personalized patterns.

The traverse is comparable to the 88, which measures 19.5mm in width.

Traverse profile:

FRONTVIEW

The front view is seamless and is perfectly matched to the side profile.

BACK VIEW

As shown in the picture below, they are connected to the frame with screws on both ends of the interior side.
